# License Find - Tip #50

There exists in the License table, a useful custom Find option for dates. The Find is accessed from the menu bar along the bottom of a List view screen.

License custom Date Find Dialog

The user may search on Received Date, Effective Date, Expiration Date, or Termination Date of the license. This Find option searches either for a particular date or a range of dates. If only the first date field is used, then only records with that date will be returned. If both fields are used, then records that fit within the range are returned.
